# Papercutter

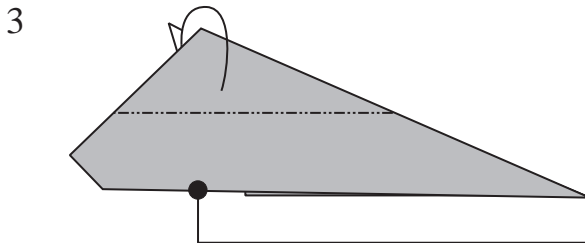

Here's a model that won't cut paper, but can give you or your victim a fabulous paper cut. For best results, use razor sharp paper.

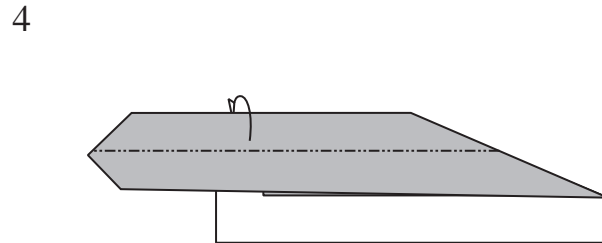

Begin white side up. Valley-fold to taste.

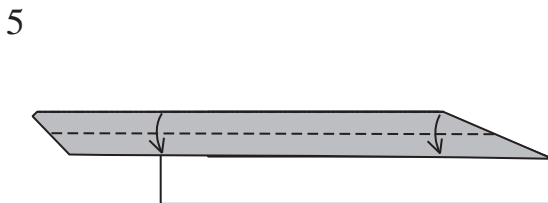

Valley-fold.

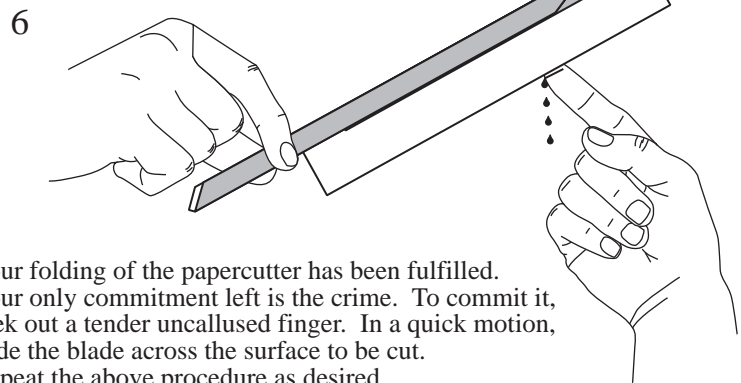

Mountain-fold. The top corner goes to the black dot.

Mountain-fold.

Valley-fold.

Your folding of the papercutter has been fulfilled. Your only commitment left is the crime. To commit it, seek out a tender uncallused finger. In a quick motion, slide the blade across the surface to be cut. Repeat the above procedure as desired.

**Warning:** The Surgeon General has determined that repeatedly operating this model could be hazardous to your health or the health of those around you. Prolonged use is not advised.
