## Message from the Editor:

Spring is here and with it has sprung big news covering all sides of the paper -- that's right, even its edges! First off, the biggest headline where BARF is concerned is that **BARF now has its own Website!**...

<http://krmusic.com/barf.htm>

(You can also get to it from Joseph Wu's Website.)

Thanks to my brother, Mike Shafer, for creating and updating the website. One highlight you'll find on the site is ready-to-print diagrams for the Surfer on the Wave.

There's also a link on the home page to my email, so please send comments, suggestions, and of course diagrams that you would like to be posted in the name of BARF. As always, I'm accepting submissions to BARF with open arms.

But, since open arms haven't been working lately (i.e. take a look at this issue), here's my new call to action: From now on, any BARF member whose diagrams appear in the newsletter will get their membership automatically extended half a year
